

QUIKLOOK USERS GROUP

ANNOUNCEMENT

2010 QUG MEETING

The 2010 QUIKLOOK Users Group Annual Meeting will be held on August 18 and 19, 2010 at the Teledyne facilities in Marion, Massachusetts. The meeting will include presentations by our staff on subjects of interest in the QUIKLOOK / MIDAS world, as well as hands-on sessions with Teledyne equipment installed on an actual MOV or AOV.

As always, we plan to have as many of our staff as possible here to participate and to be available to answer your questions. We are also planning to host a special dinner event as we have done in previous years.

Since this meeting will include a QUIKLOOK user forum, please feel free to present or to bring up for discussion any topic that you think would be useful to your fellow attendees. If you don't wish to present information, please let us know of any QUIKLOOK-related topics you would like to have us include as topics of discussion. As the 2010 QUG meeting approaches we will be sending more detailed program information, which will depend in part on what you suggest when you contact us.

If you would like to receive information on the 2010 QUIKLOOK Users Group Meeting as it becomes available, please contact David Thrall at dthrall@teledyne.com or at (508)-748-0103 as soon as possible. This announcement also appears on our web site (www.valvetest.com). We hope to see you there!
