

AC Current Probes

Teledyne Test Services offers a full line of clamp-on AC current probes for use with the QUIKLOOK II MOV Test System. These rugged, highly accurate sensors, used to capture electrical current data during an MOV test, are available in four color-coded current ranges.

Features

- Compact design for ease of use in confined spaces
- Color-coded by current range
- Full-scale ranges from 1 to 200 amps (see table below)
- Integral 18-inch cable with connector
- Connects to QUIKLOOK II cable sets or directly to the QUIKLOOK System

Teledyne MOV AC current probes are available in the following ranges:

Part No.	Color	Range		Accuracy	
		Nominal (Amps)	Calibrated (Amps)	Error (% Reading)	Phase Shift (Degrees)
160058M	Gray	1	0.1 to 1.0	+/- 4	not specified
160059M	Yellow	20	1.0 to 20.0	+/- 1.5	<= 1.5
160065M	Black	50	5.0 to 50.0	+/- 1.5	<= 1
160051M	Blue	200	10.0 to 200.0	+/- 1.0	<= 1
